HYBRID EVENT

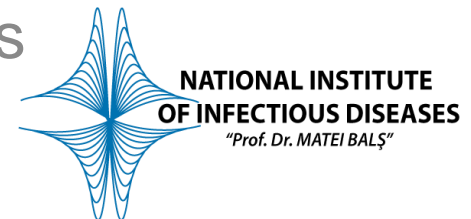

Building Bridges: Investigator's Insights on Successful Collaborations with Sponsors, CROs, Hospital Environment, Regulatory Bodies, and Patients

Anca Streinu-Cercel MD PhD

Prof. Infectious Diseases Carol Davila University

National Institute for Infectious Diseases Matei Bals

Associated member of the Academy of Romanian Scientists
Bucharest, Romania

- **Disclosures:** No conflicts of interest in relation to this presentation.
- **Outside the scope of the current presentation:** speaker, advisory boards: Gilead, ViiV, MSD
- **Views:** Own.

Investigator's Insights

Hospital Environment

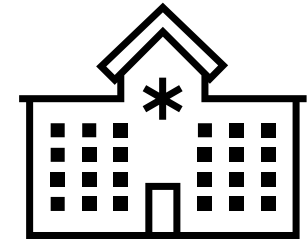

CROs

Regulatory Bodies

Patients

Investigator's Insights

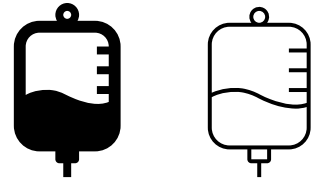

- Investigators in the hospital are basically treating physician that need more/new/innovative therapeutical options

- Focus on the patients more then to a subject
- Challenges ... multiple challenges

Sponsors

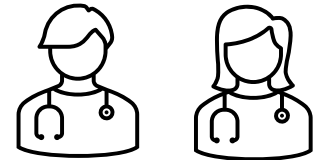

- From investigator perspective:
- open discussion,
- input on the protocol,
- Continue support from draft to finalising protocol

Hospital Environment

- Big center,
- Patient population...
- Different activities
- Romania: quite difficult to have dedicated research personnel
- Multitasking
- Scientific Partnership with dedicated RA is very useful

CROs

- Is a key partner is the picture
- Quality
- Final result

Regulatory Bodies

- Key player in the picture
- EU space, not only

Patients

- Subject

- The effect of research is based on the need for new options

The result?

- **Options for patients**
- **Innovative solutions/ -> integrated with medical care**
- **Research platform open**

- **Training for doctors**
- **Access to UpToDate information**
- **Networking**
